It's a Technology Company…
But What Does Impulse Do?

Simply stated, Impulse products automate and secure BYOD (Bring Your Own Device) and network access management. Our flagship product, SafeConnect™, provides the visibility needed to know exactly who and what is on the networks and the ability to enforce security policies computing.

We do this through the use of Contextual Intelligence ™– real-time device information that correlates identity/role, device type, and location (along with other attributes such as ownership and compliance status) over time.

Company Background

Founded in 2004, Impulse began by building network access control (NAC) solutions for the Higher Education sector, making it one of the original technology companies addressing BYOD and mobility challenges. We provide our customers with a balance of convenient access, visibility and security. SafeConnect was designed and developed with the dynamic and continuously changing university user base in mind. More than 4 million devices across the country are under SafeConnect's management.

Strategic Partners

Impulse was chosen as the Preferred Partner for NAC by Dell and has been named as a Tier One Partner. Tier One status is bestowed on a select number of key strategic partners whose products are deemed worthy of compensating the Dell sales force and to drive additional sales.

We also have a strategic alliances with companies such as Aerohive Networks, Brocade, iBoss, Juniper, Palo Alto, and SonicWALL.

What is the Company Like?

Impulse offers a highly competitive compensation package and the professional advantage of an environment that recognizes your contributions and supports continued personal development.

Company and Brand Values

While not quantifiable, the following values are the cultural and inspirational ideas that guide Impulse towards excellence. They represent the qualities Impulse wants to be known for through its brand and the high standards the company sets for performance and delivery.

Integrity Always. Impulse is committed to doing everything it does exceptionally well. From the technologies we build to the IT teams we support, we are focused on doing our very best for the people we serve and the networks we support.

Responsive and Reliable. Impulse's reliability is unmatched because we follow through on everything we do. We are committed to quickly responding to our

client's needs, ensuring our technologies always deliver and making our support teams the most reliable IT resource our customers have.

Innovation Simplified. Impulse believes in being innovative on the inside to be reliable on the outside. We deliver cutting-edge network access and intelligence technologies that are simple to implement yet rich in capabilities and results.

Ready to Adapt. A company founded to meet the needs of changing technologies and networks, Impulse knows the critical importance of continuous advancement and adaption. We pride ourselves on a visionary outlook that allows us to continually adapt our technologies and approach to meet evolving market and industry demands.

We Care. Impulse is a company of dedicated, caring people who love the work they do, the technologies they develop and the clients they serve. Our mindful commitment to work and the workplace makes us better at our jobs and better at helping our clients get their jobs done.

The SafeConnect Product Team

At Impulse, *everyone* works to get the product out the door. That includes Sales, Marketing, Channel Partners, Product Development, Service Delivery AND Customer Support teams. However, it's the development, delivery, and support teams where you probably have the most interest.

Product Development. In this role, you will work within a team of software engineers helping create-- that is, to design, code, test, and support new and existing product features using leading edge tools and technologies.

Service Delivery. These specialists and engineers have responsibilities including technical sales consulting, network integration services, and deployment services.

Customer Support. Grow in mastery of a wide variety of technologies. Define your area(s) of specialty and drive innovation, as you help our close-knit team push customer support and DEVOPS to the next level. Grow professionally and personally as you own the technical side of customer relationship management.

Quality Assurance.   Help create, execute, and automate test plans and test cases. In this role, under the guidance of a lead software tester, you will work as part of a larger team giving feedback on specifications, input on design, and validating functionality and usability.

Network Integration.   Be responsible for product integrations between Impulse products and Partner networking and security platforms. In this role, you will work closely with Product Development, Service Delivery and Support Teams to design and deliver strategic certified solution integrations between industry leading network and security technology providers.

Impulse | Experience the Freedom
Impulse is the leading provider of Contextual Intelligence™ and access control solutions in support of BYOD-friendly enterprises. Impulse securely and efficiently automates BYOD by combining our real-time, context-aware and simplified architecture, remote managed support services and customer-centric business philosophy to enable customer freedom. Our customers know this as the Impulse Experience. The security of more than four million endpoints is entrusted to Impulse.
